OBJECTIVE: Passionate Software Engineer with 5.5 Years of experience in Web Development. Skilled in JavaScript, TypeScript, React.js, React native, HTML,CSS.

Professional Summary

- Having 5.5 + Years of IT experience in developing and supporting applications based on **React.js, React native, JavaScript, HTML, CSS,.**

- Hands on experience in JavaScript, ReactJs, React native, HTML, CSS, Material UI, Redux Statemanagement, Redux middleware (Thunk), GIT, BITBUCKET, Visual Studio Code.

- Developer skills including Responsive Web Application development using Media queries, Enterprise Edition Websites development using ReactJs.

- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model.

- Good Knowledge on Writing ECMA 2016-2020 and up-to-date with current frontend technologies**.**

- Strong Knowledge and Hands-on Experience in deploying the ReactJs Application In AWS.
- Experience using JIRA Software for bug tracking, issue tracking and project management functions.
- Working on multiple projects, coordinate dependencies, and interact with the internal teams.
- Hands on experience on Build reusable components and front-end libraries for future use and Optimize components for maximum performance across a wide range of devices and platforms
- Strong Knowledge and Hands-on Experience Called the Restful web services calls for POST, GET, PUT, DELETE and PATCH methods.
- Proficient in Java Script, including DOM manipulation and the java Script object model (Application Development).
- Hands on experience with object-oriented JavaScript design patterns, exception handling and performance.
- Experience in using various predefined functions from NPM (Node Package Manager) and React Router library.
- Developed front-end web application into the component-based design by using React, React-Redux.
- Used Media Query, Flexbox in CSS3 and Gird System in Bootstrap for responsive web design.
- Hands on experience using React UI libraries such as **Material UI**, **Ant Design** and **React-bootstrap**, developing web more efficiently with high-quality and responsive components.
- Performed the system Testing, Regression Testing for complete UI after fixing the issues which are reported by Testing Team.
- Hands on Using React Hooks(State Hook, Effect Hook, Ref Hook and so on) to use state and lifecycle methods inside functional components.
- Developed architecture of Mobility Suite Apps and Design the app and build UI.

Skills:

Technologies	JavaScript, ReactJs, Redux State management, HTML, CSS, Material UI, Redux(Thunk), React-router, React Native, GIT and Visual Studio Code.,
Languages	JavaScript, React.JS
Tools	Visual Studio Code, GIT, GITHUB, BITBUCKET, Android SDK
Database	SQL , MySQL

Work Experience:

ReactJs Developer - 11/2017 to 11/2020
Moka Software Pvt Ltd, Bangaluru.
Electronic Medical Records.
ReactJs Developer - 11/2020 to till date.
Shyft Innovations Pvt Ltd , Hyderabad.
Luggage storage and delivery service in Dubai, Qatar.
Front-End Developer – 10/2022 to till Date.
Wego India pvt ltd, Bangaluru
Flights & Hotels Travel Domain

Project Details:

Project Title	DocChoice Electronic Medical Records.
Environment	Visual Studio Code, HTML, CSS, Javascript , ReactJs, Redux State management, TypeScript.

Responsibility:

- Requirement Involved in Technical decisions for Business requirement, Development team.
- Developed responsive Web Components using CSS, Material UI and ReactJS.
- Designed and updated layouts to meet usability and performance requirements.
- Determining the structure and design of web pages.
- Developing features to enhance the user experience.
- Building reusable components and front-end libraries for future use
- Developed Components using functional programming in ReactJS with Hooks for state management And Life-cycle methods for Class components.
- Experience in developing customized templates using the latest ES6 (Ecma Script) and Typescript.
- Good team member, positive attitude and result oriented, Self-motivated, quick learner, willing to adapt to new technologies & new challenges
- Strong analytical and problem-solving skills, good interpersonal skills and enjoys working in teams.
- Developed single page applications (SPAs) using React-Router and to enable navigation from one-page view to another the next as clients performs application tasks.

- Developed reusable components using React Storybook according to design guidelines.
- Developed components represented in our design system using React and Typescript and styled Components library.
- Used Axios to handle HTTP request in a React and Redux application.
- Used ES6, JSX with react for component development make react look more elegant.

Project Title	Luggage storage and delivery service in Dubai C2C
Environment	Visual Studio Code, HTML, CSS, Javascript , ReactJs,Material UI, Redux State management, BITBUCKET

Responsibility:

- Developed system to manage the price based the pickup and delivery locations.

- Hands on experience React Google maps APIs , Google map pointing locations and tracking.

- Useful to manage the Price, promo codes, user management and report generation platform working on UI component design using React and Redux.

- Performance enhancement using Component Reusability And Responsiveness for all devices.

- Handling global State management using Redux.
- Crafting and maintaining the code using BITBUCKET and Visual Studio Code.
- Extensively used all the new HTML5 features such as local storage, new input attributes, Canvas, SVG, audio & video.
- Used new CSS3 features such as multi-column layout, gradients, web fonts, transform and transpose.
- To make the workflow faster and more efficient, we used CSS preprocessor SASS with its new syntax SCSS.
- Used JIRA as a tool for project tracking and management where we update the daily tasks performed.
- Used Web pack to bundle Typescript and JavaScript modules and used Babel as transpiler.
- Involved in configuring the Git repository and maintain the version control using Git.
- Involved in Manual Testing and writing test cases for the end-to-end application process.
- Strong communication, analytical and interpersonal skills working within cross-functional teams.
- Thorough understanding of the differences and bugs in various browsers and browser versions.
- Implemented dynamic page elements and form error validations using JAVASCRIPT.
- Experience on working with CSS Background, CSS Layouts, CSS positioning, CSS text, CSS border, CSS margin, CSS padding, CSS table, Pseudo classes, Pseudo elements and CSS behaviors in CSS.

Project Title	Luggage storage and delivery service in Dubai and Qatar B2C and C2C
Environment	Visual Studio Code, HTML, CSS, Javascript , ReactJs,Material UI, Redux State management , React Native

Responsibility:

- Web portal for Shyft application is useful to create different partners namely Hoteliers, Drivers etc.

- Useful to manage the Price, promocodes, user management and report genration platform.

- Developed system to manage the price based the pickup and delivery locations.

- Handling React Google maps APIs, Google map pointing locations and tracking.

- Performance enhancement using Component Reusability and Responsiveness for all devices.

- Handling global State management using Redux.

- Working on the backend web application for managing all the information related to the customer application for baggage Crafting and maintaining the code using GIT and Visual Studio Code.

- Handling the web services using fetch and Axios Library.
- Hands on experience React Google maps APIs , Google map pointing locations and tracking.

- Implemented React Container and presentational components as Stateless and Functional Components when applicable

- Developed Components using functional programming in ReactJS with Hooks for state management And Life-cycle methods for Class components

-
